

International Workshop on Micropiles August 21-24, 2019

Sofitel Broadbeach, Gold Coast, Queensland, Australia

Call for Abstracts

Papers are solicited on the following micropile topics:

- State of Practice and Research
- Seismic Design
- Applications
- Innovations
- Challenging Subsurface Conditions (karst, groundwater)
- Historic Renovation
- Load Testing
- Numerical Analysis
- Micropile/Structure Connection Details
- Codes and Guidance Specifications
- Equipment and Material Evolutions
- Case Histories and Lessons Learned
- Durability and Design Life
- Landslide Prevention/Slope Stabilization
- Construction Challenges

To participate, submit an abstract up to 300 words summarizing your proposed paper content through the portal at www.ismicropiles.org. Abstract submission confirms your intent to submit a full draft paper for consideration by the Paper Review Committee.

Key Dates:

- **Abstracts due Friday, September 14, 2018**
- Acceptance of Abstracts Friday, October 5, 2018
- Draft papers due Friday, February 1, 2019
- Reviewer comments returned to authors no later than Friday, April 5, 2019
- Final, revised papers due Friday, May 3, 2019

Authors will be required to submit electronic versions of written final papers for inclusion in the Workshop Proceedings. The Program Committee will select speakers to make oral presentations at the Workshop. Presentations will be made in plenary sessions and followed by in-depth discussion.
